EDUCATION

Doğuş University Software Engineering

2023 – 2027

TECHNICAL SKILLS

Development & Frameworks

- **Mobile:** Swift, SwiftUI, UIKit, SwiftData
- **Frontend:** Angular, HTML, CSS
- **Backend:** .NET Core, C#, SQL, RESTful APIs

Architecture & Databases

- **Architectures:** MVVM, MVC
Clean Architecture, Onion Architecture
- **Databases:** Oracle
Database, SQL Server, Firebase

Networking & Tools

- **Networking:** Moya, Alamofire
- **Tools:** Git, GitHub, Postman, Swagger, Xcode
- Methodologies: Agile / Scrum

LANGUAGE

- English: B2
- German: A2

PROJECTS

- CineScope Movie App: AI-Powered Recommendation (UIKit, OpenAI API, Moya, SnapKit, Lottie)
- PettiCare App: Pet Care Tracker (SwiftUI, MVVM, SwiftData, CoreLocation, MapKit)
- FinGen Bank Project: Full-Stack Banking (Angular, .NET Core, Clean Architecture, Oracle DB)
- Heydou Campus: Campus Social Solution (C#, MSSQL, HTML, CSS, OpenAI Integration)

PROFILE

I approach software development with an engineering mindset, focusing on solving real-world problems and building maintainable, well-structured software solutions. As a Mobile Team Lead at GDG On Campus, I coordinate technical initiatives and support collaboration within the student developer community. Through academic projects and technical communities, I continuously develop my practical experience and grow as a software engineer.

CERTIFICATES

- iOS Bootcamp – Kasım Adalan (Udemy)
- SwiftUI Bootcamp – Techcareer.net
- DenizAşırı Online Internship Program – DenizBank
- GitHub Career Workshop – Techcareer.net
- “Learning SQL with Applications” – BTK Academy
- C# Projects: Learning by Building Applications – Udemy
- Microfon English Course Certificate – Microfon

WORK EXPERIENCE

VakıfBank – Mobile Application Development Intern (Jul 2025 – Sep 2025)

- Actively contributed to the development of PettiCare and CineScope iOS applications.
- Built user interfaces and application flows using Swift and UIKit.
- Integrated OpenAI APIs (Function Calling) to enable personalized movie recommendation flows.
- Implemented a modular and maintainable networking layer using Moya and Alamofire.
- Managed authentication and dynamic content using Firebase Authentication and Remote Config.
- Handled persistent data storage with SwiftData.
- Developed features following MVVM architecture within Agile (Scrum) sprint cycles.

VakıfBank – Software Engineering Intern

(Jan 2026 – Feb 2026)

- Worked on a self-developed banking application as part of my internship, focusing on web and backend development.
- Developed account and card management modules using Angular and C# / .NET Core.
- Managed business logic with Oracle DB using Stored Procedures & Packages.
- Implemented authentication using JWT.
- Built backend components following Clean Architecture and Repository Pattern.
- Worked within Agile (Scrum) development cycles.
